Let's meet the New Generation Hygienic Papers!

**%100 Eco-Friendly** | **100% Recycled** | **Super soft** | **3 Ply**

“Good for nature, good for you.”

**Turkey's first 100% recycled, 3-ply value added eco-friendly hygienic tissue papers!**

**New Generation Tissue Papers; Eco-friendly tissue paper produced from 100% recycled cellulose fibers.**

As Viking Pulp and Paper Mill Co, Turkey's first private sector paper factory, we are working to leave a better world to future generations with our responsible production principles, in line with our sustainability goals, and adding a new one to the firsts we have brought to the sector!

Thanks to the brand new "Recyfiber" technology solution, a first within Turkey tissue paper industry and being implemented in partnership with Tetra Pak®, we produce 100% recycled, eco-friendly, and super-soft, hygienic tissue papers from used beverage carton packages.

We recover the cellulose fibers in beverage carton packages which is made of 70% paperboard on average and turn it into a raw material for the paper industry. Thus, we give new life to used beverage carton packages and regain them to the industry, economy and our world.
